

Halton Healthcare is an innovative, growing organization with three progressive community hospitals, providing quality health services to more than 350,000 Halton residents. Halton Healthcare is Accredited with Exemplary Standing by Accreditation Canada.

ADULT GENERAL PSYCHIATRIST

Halton Healthcare is seeking a full time Adult General Psychiatrist to work in our Adult Outpatient Services.

Halton Healthcare is a fully accredited community hospital and an affiliated clinical education campus for McMaster University. The Mental Health Program provides service across all three hospital sites, including Oakville Trafalgar Memorial Hospital, Milton District Hospital and Georgetown Hospital. Using a collaborative inter-disciplinary model of care, the Mental Health Program offers a full continuum of services for patients across the lifespan, including emergency mental health services, inpatient beds, consult-liaison psychiatry, and outpatient services.

Working within our inter-disciplinary team environment, you will provide evidence-based assessments, consultations, and follow-up care to general psychiatry outpatients. You will liaise with key stakeholders such as primary care and community agencies. You will participate in case conferences, program planning and quality improvement initiatives. Reporting to the Chief of Psychiatry, you will work closely with our team of psychiatrists and participate in departmental meetings, continuing education, student training, and our on-call roster.

Successful candidates must have a license to practice in Ontario and a strong background in general psychiatry, preferably in a hospital setting. We thank all applicants for their submissions; however, only qualified candidates will be contacted to attend a pre-application interview.

For further information or to submit your curriculum vitae, contact Dr. Alan Brown, Chief of Psychiatry, Halton Healthcare via email to Andrea D'Sa, adsa@haltonhealthcare.com
